A SELECTED WORKING BIBLIOGRAPHY ON RESEARCH IN DISASTER RELIEF PLANNING

Compiled by Jerry Finrow and Dwayne Brittell
Center for Environmental Research
University of Oregon
Eugene, Oregon

INTRODUCTION

This bibliography has been developed to determine the existing knowledge concerning environmental research on the disaster stricken. Secondary issues were examined concerning behavior under stress in an attempt to broaden the scale of concern to encompass material thought to be relevant to the prime topic. Books, pamphlets, public documents, periodicals and dissertations were surveyed. It is hoped that this bibliography is fairly complete.

This is the first part of a project that seeks to examine the environmental needs of those in highly stressful situations and to attempt to develop performance criteria for environmental planning in disaster relief. There are, however, implications drawn from the material which take it out of the rather narrow realm of disaster studies and finds parallels in the urban condition and in strategies for developing countries.

This project has been assisted by a grant from the Office of Scientific and Scholarly Research at the University of Oregon, Eugene, Oregon.

BOOKS

Baker, G. W. and D. W. Chapman, Man and Society in Disaster. New York: Basic Books Inc., 1962.

1. A Brief Introduction to Contemporary Disaster Research by D. W. Chapman.
2. The Methodological Challenge of Disaster Research.
